

9.1P: In Person Check-in 3 – Answer Sheet

1. What was the most challenging aspect of the case study tasks? Why?

The most challenging parts was the implementing the 4th Iteration. The Interface class which was the IhaveInventory was to difficult to work with. There was a lot of hectic errors came along the way but eventually was able to get them through.

2. What is the most valuable thing you have learned in this unit so far?

The concepts of OOP and the other foundational materials in this unit will be helpful for my future units such Intro to AI.

3. What are some strategies for success you can start or continue using for the remainder of the semester and in future units?

Time management was a major problem with me while balancing the other units. Also since had to help my friends with their problems was also made a mess since there was a lot pressure at the end of the each semester.
